

ERIC EVANS SOFTWARE ENGINEER.

zipbugdev@gmail.com

(801) 837-6106

BIOGRAPHY.

A tech enthusiast and lover of learning new languages and programs. I got started programming by finding a bug in the console log of one of my first jobs out of highschool and reporting it to their development team, they asked if I was interested in learning and joining the development team. Seven years later I've learned my front end skills through study, classes, and a thirst for knowledge.
